Key TB policies dashboard

National policies indicate	Cambodia	PNG	Philippines	Viet Nam
Diagnosing TB				
a rapid molecular diagnostic (RMD) as the initial test for TB				
urinary TB LAM for routine diagnosis of TB in people living with HIV (PLHIV) and the test is routinely used in both inpatient (IPD) and outpatient (OPD) settings* **				
RIF and INH resistance testing for all people starting on treatment; at least FLQ resistance testing for all people with RR-TB; and DST methods available in country for RIF, INH, FLQs, Bdq, Dlm, Lzd, and Cfz, when these medicines are used for routine treatment ¹				
Treating TB and Models of Care				
decentralised DR-TB treatment to primary healthcare (PHC) facility and at home ^{2,**}				
routine use of injectable-free regimens for children with uncomplicated DR-TB				
use of a modified shorter all-oral regimen for eligible adults with DR-TB, either for routine use or operational research ³				
no limitation to the routine,4 combined use of Bdq and Dlm5 beyond 6 months**				N/A***
Preventing TB				
a shorter TB preventive treatment (TPT) regimen (3HP, 3RH, 4R or 1HP) ⁶				
household contacts of a person with bacteriologically confirmed DS-TB and DR-TB are investigated for signs and symptoms of TB**				
PLHIV are eligible for TPT				
household contacts of a person with bacteriologically confirmed DS-TB are eligible for TPT, regardless of age**				
Procuring Medicines for TB				
Country is enrolled in the WHO Collaborative Registration Procedure (CRP) ⁷				
Stringent regulatory authority (SRA) ⁸ approval and/or WHO Prequalification (PQ) ⁹ required for importation of TB medicines purchased with domestic funding				
SRA and/or WHO PQ quality-assured product status required for procurement of locally manufactured TB medicines		N/A***		

LEGEND Is this policy in place at the national level? ■ Yes ■ Partial ■ No ■ No data N/A - Not applicable

(*) Source: WHO and Stop TB Partnership (accessed 2020 Oct.). (**) This data consists of two or more individual indicators. "No data" is used when there is "no data" for one or more of the individual indicators considered. (***) Bdq and/or Dlm are not indicated in the national policies for routine treatment. (****) TB medicines are not locally manufactured, or locally manufactured TB medicines are not procured.

(***) Bdq and/or Dlm are not indicated in the national policies for routine freatment. (****) IB medicines are not locally manufactured, or locally manufactured 18 medicines are not procured.

(1) Abbreviations: rifampicin (RIF), isoniazid (INH), fluoroquinolone (FLQ), rifampicin-resistant TB (RR-TB), bedaquiline (Bdq), delamanid (Dlm), linezolid (Lzd), clofazamine (Cfz). (2) DR-TB treatment initiation and followup can be done at a PHC facility and medicines can be taken at home. (3) Modifications to the standardised shorter regimen (beyond the two medicine substitutions allowed by WHO) include replacing the injectable
with bedaquiline or other modifications. (4) This excludes extensions beyond 6 months upon special approval (e.g. consilia or expert groups); it also excludes countries that allow extensions beyond 6 months, but for
specific duration (e.g. 36 weeks), (9) Combined use of Bdq and Dlm could be limited to certain groups of patients. (9) 3HP: 3 months of rifampicin given weekly; 3HP: 3 months of rifampicin plus isoniazid
given daily; 4R: 4 months of rifampicin given daily; 1HP: 1 month of rifapentine plus isoniazid given daily. (7) The CRP accelerates registration through timely sharing of medicine dossiers to national medicines regulatory
authorities (https://extranet.who.int/prequal/content/collaborative-procedure-accelerated-registration). (9) For more information about SRAs: https://www.who.int/medicines/areas/quality_safety/quality_safety/quality_assurance/TRS1010annext1.pdf?ua=1 (WHO definition of SRA on page 356). (9) WHO PQ
assesses medicines and active pharmaceutical ingredients to ensure they are safe, appropriate and meeting stringent quality standards: https://extranet.who.int/prequal/content/what-we-do.
